SIDDARTHA SURISHETTI

Warangal, Telangana, India
G-Mail — +91 9866536282 — LinkedIn — GitHub

Career Objective

Computer Science undergraduate seeking **Software Engineering Intern** opportunities, with hands-on experience building web applications, AI-powered tools, data-driven platforms, and personal software products. Strong foundation in Python, Data Structures & Algorithms, and web development. Passionate about building useful software products, learning emerging technologies, and contributing to real-world software solutions.

Education

SR University, Warangal **2025 – 2029**
Bachelor of Technology in Computer Science & Engineering **CGPA: 8.2**

Alphores Junior College **2023 – 2025**
Intermediate (MPC) **970/1000 marks**

Technical Skills

Languages: Python, HTML, CSS
Core: Data Structures & Algorithms (120+ problems), Object-Oriented Programming
Tools: VS Code, GitHub, Vercel, Render, Netlify
AI/Development: Cursor, Codex, Antigravity, Manus, OpenCode

Project Experience

DSAMRR – Multi-Platform DSA Progress Dashboard Live — GitHub

- Built a unified platform where users can connect and verify profiles across LeetCode, CodeChef, HackerRank, GeeksforGeeks, and other DSA platforms.
- Aggregates users' problem-solving activity into a single dashboard and automatically refreshes platform data every 2 hours.
- Ranks users based on their combined DSA activity, creating a leaderboard from the most active problem solvers to the least active.

DomainYourLink – Persistent Link Redirects & Analytics Live — GitHub

- Built a service that creates stable shareable links for social profiles and other destinations.
- Users can update their username or handle once while previously shared links continue working through automatic redirection.
- Includes click analytics to track link usage.

LifeAgent – Personal AI Life Assistant Live — GitHub

- Built a personal productivity platform for tracking sleep, habits, water, money, fitness, notes, diary entries, and calendar events.
- Provides reminders and notifications for important activities.
- Includes a personal AI assistant that can add transactions, write notes, and manage calendar events.

Achievements & Extracurricular

- Successfully participated in a rigorous 12-hour Python-based hackathon focused on rapid prototyping and clean coding practices.
- Solved 120+ Data Structures & Algorithms problems.

Personal Strengths

Analytical Thinking — **Growth Mindset** — **Communication** — **Discipline**

Hobbies

Calisthenics
